第6問題 13点

問1	イ (5点)
問2	<p>I agree with the author's decision. Extra credit often rewards effort instead of true learning. When students can retake tests or redo assignments, their grades reflect what they really understand, not where they started. This system encourages long-term growth and reduces pressure from one-time failures. In my experience, students become more motivated when they see that improvement actually counts. It helps them focus on mastering the subject rather than chasing extra points, and it encourages persistence and builds confidence through continuous learning. (82 語)</p> <p>(8点)</p>
